

6-11 OCTOBER NEC | BIRMINGHAM

BIM SURVEY

The research by UK Construction Week, in partnership with BRE, questioned more than 1,200 architects, contractors, developers, engineers and product manufacturers about their experiences of BIM, revealing a number of uncertainities throughout the industry.

In partnership with:

What do you think about

To what extent has your company used BIM in the last 12 months?

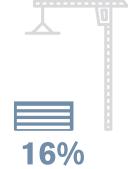

We regularly use it on our projects.

We've completed some projects using it.

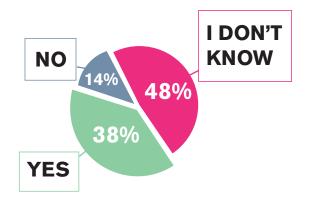

Have not used it yet but we have plans to soon.

Have not used it and have no plans to.

If you have used BIM before, has it made direct improvements to the efficiency and cost of projects?

BIM Level 2 is set to become mandatory in 2016. Do you feel that the

industry is ready to meet this requirement?

74% NO 26% YES

the introduction of BIM:

NEGATIVE

development for the construction

POSITIVE development for the construction

NO DIFFERENCE

What is the MAIN BARRIER facing more widespread BIM adoption?

11%

Lack of client buy-in

15%

Lack of construction contracts specifying BIM and collaboration Lack of in-house

25%

expertise

Lack of understanding in the supply chain

Lack of senior management buy-in

14%

No time to dedicate to BIM

12%

Cost

How collaborative do you feel BIM is in the real world? Is it meeting the goal of collaboration across projects?

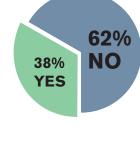

43% YES

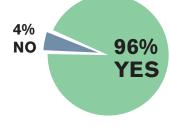

57% NO

Do you feel that you clearly understand the requirements of what is expected under BIM Level 2?

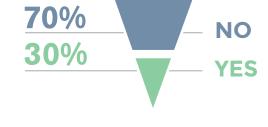

Do you think there is a need for more support and training in BIM?

quickly enough to provide BIM enabled information?

Are manufacturers moving

When recruiting new personnel, do you now require them to be BIM literate?
